Where's Agriculture?

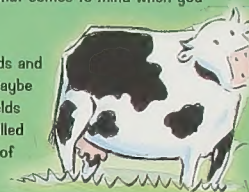

Find out how agriculture touches your life, from the games you play to the homes you build - agricultural products are everywhere.

Where is agriculture...? Virtually Everywhere.

What's the first thing that comes to mind when you think of agriculture?

Perhaps it's wheat fields and threshing machines. Maybe cows grazing in the fields or a country kitchen filled with the sweet aroma of freshly-baked pies.

When thinking of agriculture, it's not likely you'd have images of shaving cream or kitty litter or a host of other everyday items that are made from agricultural products.

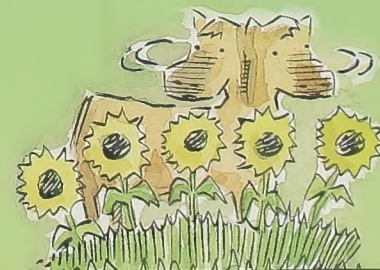

A Growing Industry

There's no doubt the definition of agriculture is broadening. As technology continues to advance at breakneck speed, researchers across the globe are finding new and more elaborate uses for our agricultural resources. And we are discovering just how much agriculture contributes to our busy, hectic lives.

In our homes, at our workplaces, in our communities - agriculture is virtually everywhere you look. From common household items like drywall, detergent and candles to the footballs professional players throw on the football field.

Agricultural products are used extensively in manufacturing, pharmaceuticals, construction and countless other industries that power society's engines and drive us to new and interesting places.

WHERE'S AGRICULTURE...?

Can you find the following items??

(The connection to agriculture is in *italics* below each item).

- Camera
Film made from *gelatin in cattle bones*
- Leather boots
Leather comes from *animal hides (hogs, cattle, ostrich or bison)*
- Tennis racket
Strings made from *sheep intestines*
- Airplane
Plane de-icer from *canola*
- Diaper
Made with *cornstarch*
- Insulation
Made from *corn and wheat straw*
- Shaving cream
Made from *cattle fat*
- Pillow
Stuffed with *turkey feathers* or *goose down*
- Kitchen countertop and cupboards
Made from *particle board* which contains *wheat straw*
- Candles
Made from *beeswax*
- Football
Made from *pig skin*
- Suntan lotion
Made with *canola oil*
- Fishing pole
Hooks made from *rooster feathers*
- Briefcase
Made from *cow or pig hides*
- Bicycle
Bicycle tires manufactured using *fatty acids from cattle*
- Letters (mail)
Paper made from *wheat straw*
Potato starch used for *sizing paper*
Ink made from *flax and canola oil*
- BMW door panels
Made from *flax fibre*
- Handprints in cement
Sugar helps *cement* dry slowly
- Fireworks
Made from *corn*
- Gas pump
Ethanol gasoline made from *grain*
- Straw hat
Made of *straw*
- Drywall
Contains *hog hair*
- Car on hoist
Hydraulic fluid made from *canola*
Brake lining - *flax* Spark plugs - *corn*
- Solvent
Made from *flax*

JUST FOR FUN - Can you find...

- A chicken playing golf
- A cow wearing sunglasses
- A gopher on the golf course
- Two chickens tossing a football
- A duck driving a car
